

# Why use Plastic Trims?

**Better job quality**

**Save time & money**

**Easy to handle**

**Rustproof - no corrosion**

Plastic Components' PVC accessories and plastic lath (Ultra-Lath®) for stucco, drywall, exterior insulated finish systems (EIFS) and direct applied systems (DEFS) are the superior alternative to metal trims!

**Plastic trims save money by saving on labor** They eliminate the need to build hand-formed details – or to make field-splices. Our trims come ready to use.

## Plastic Trims are:

- Non-rusting, corrosion proof
- Light weight
- Safe on hands
- Easy to cut, handle and install with everyday tools
- UV protected for exterior applications
- Compatible with all cement-based products
- Easy to store on the jobsite without being damaged

**Damage resistant**

Plus, they meet or exceed the high standards set by ASTM and other agencies for tensile and flexural strength, dimensional stability and exterior weather resistance.

Look for the ITS/Warnock Hersey mark on all our PVC accessories.
